		document	tation that	this water	body is imp	ortant for the
PRTANT: Provide on the copy of a second of	all supporting migration of methods, sampling showing locur information	document anadromou ing durat sation of	ion and area mouth and o specific st	luding: num a sampled; o bserved upp tream reach	per of fish a copies of fis per extent of es observed	ld notes; etc each species
PRTANT: Provide of ming, rearing or erved; sampling of a second of	all supporting migration of methods, sampling map showing local information cations, types,	document anadromouting durat sation of such as: , and hei	is fish, inc. ion and area mouth and o specific st ights of any	luding: num a sampled; cobserved upg tream reach barriers;	per of fish a copies of fis per extent of es observed etc.	eld notes; etc each species as spawning
ming, rearing or erved; sampling ach a copy of a swell as any othering habitat; lowests:	all supporting migration of methods, sampling showing locar information cations, types,	document anadromouting durat sation of such as: , and hei	s fish, inc. ion and area mouth and o specific st ights of any Inspec	luding: num a sampled; cobserved upg tream reach barriers;	per of fish a copies of fie per extent of es observed etc.	each species as spawning
ming, rearing or erved; sampling is ach a copy of a smell as any othering habitat; lowents: DVRING	all supporting migration of a methods, sampling locur information cations, types, forps, PR	document anadromouting durat sation of such as: , and hei RHCT/CF:	s fish, inc. ion and area mouth and o specific st ights of any	luding: num a sampled; cobserved upg tream reach barriers; errow t	copies of fie er extent of es observed etc. XAMINED	each species as spawning of Pools
paramit: Provide wing, rearing or erved; sampling ach a copy of a swell as any othering habitat; lowents: DVRING UPSTREAM of pools.	all supporting migration of methods, sampling showing local information cations, types, FORFET PRESENTED SEVENAL (document anadromouting durat sation of such as: , and hei RHCT/CF:	south and composition and area mouth and composition straights of any and any British	luding: num a sampled; cobserved upg tream reach barriers;	copies of fie er extent of es observed etc. XAMINED	each species as spawning
PRIABLE: Provide of ming, rearing or erved; sampling of a seel as any othering habitat; localist DURING UPSTREAM of pools.	all supporting migration of a methods, sampling locur information cations, types, forps, PR	document anadromouting durat sation of such as: , and hei RHCT/CF:	s fish, inc. ion and area mouth and o specific st ights of any	luding: num a sampled; cobserved upg tream reach barriers; errow t	copies of fie er extent of es observed etc. XAMINED	each species as spawning of Pools
paramet: Provide or ming, rearing or erved; sampling and a copy of a seell as any othering habitat; located by the pools. In pools.	all supporting migration of methods, sampling showing local information cations, types, FORFET PRESENTED SEVENAL (document anadromouting durat sation of such as: , and hei RHCT/CF:	s fish, inc. ion and area mouth and o specific st ights of any	luding: num a sampled; cobserved upg tream reach barriers; errow t	copies of fie er extent of es observed etc. XAMINED	each species as spawning of Pools banks +
print: Provide ming, rearing or erved; sampling mach a copy of a mell as any othering habitat; lowests: DVRING UPSTREAM of pools; apparent ba	all supporting migration of migration of methods, sampling local information cations, types, FOREST PRESENTE KASAAN Several (MINISTER)	document anadromoung durat sation of such as: , and hei RACTICE: High	is fish, inc. ion and area mouth and o specific st ights of any s Inspec	luding: num h sampled; c berved up tream reach barriers; erion t ldge: P	copies of fier extent of es observed etc.	each species as spawning of Pools banks +
paramet: Provide or ming, rearing or erved; sampling and a copy of a seell as any othering habitat; located by the pools. In pools.	all supporting migration of migration of methods, sampling local information cations, types, FOREST PRESENTATION Serveral (Wri'er	document anadromoung durat sation of such as: , and hei RACTICE: High	s fish, inc. ion and area mouth and o specific st ights of any	luding: num h sampled; c berved up tream reach barriers; erion t ldge: P	copies of fier extent of es observed etc.	Pools banks + NO ALASKA DEPT. FISH & GAN
PRIABLE: Provide ming, rearing or arved; sampling mach a copy of a sell as any othering habitat; lowests: DVRING UPSTREAM of pools; apparent ba	all supporting migration of migration of methods, sampling local information cations, types, FOREST PRESENTE KASAAN Several (MINISTER)	James D	is fish, inc. ion and area mouth and o specific st ights of any s Inspec	bitat Biolo	per of fish copies of ficer extent of extent o	each species as spawning of Pools banks +
